Work Experience

Jan. 2025 – Jul. 2025 **Java Software Engineer Intern**, *Nativy Translations*, Vienna, Austria

- Developed and maintained backend services that support CRM and analytics workflows.
- Wrote and optimized SQL queries and database routines, improving reporting performance by 25%.
- Implemented REST API endpoints for data retrieval and integration with internal tools.
- Refactored the existing codebase to improve readability, maintainability, and performance.
- Containerized applications with Docker and created deployment scripts for development environments.

Feb. 2023 – Aug. 2023 **Java Software Engineer Intern**, *Yandex*, Moscow

- Assisted in refactoring legacy services to improve maintainability and align with modern Spring Boot 3 practices.
- Implemented and maintained unit and integration tests, contributing to higher code coverage and system reliability.
- Developed several small-scale processes/services that communicated with the system via Kafka, enabling interaction with other microservices.
- Helped configure monitoring dashboards (Grafana, Prometheus) to track service health and performance.
- Participated in team code reviews, learning best practices in large-scale distributed systems.

Education

Aug. 2023 – Nov. 2025 **Bachelor of Engineering in Industrial Information Technology**, *LAB University of Applied Sciences*, Lappeenranta, Finland

Sep. 2021 – Dec. 2023 **Bachelor of Engineering in Robotics and Artificial Intelligence**, *ITMO University*, Saint Petersburg

Technical Skills

Languages	Java, Python, JavaScript, SQL
Frameworks	Spring Boot 3, React, jOOQ, Node.js
Databases	PostgreSQL, MySQL, Redis, Kafka
DevOps & Cloud	Docker, Kubernetes, Gitlab CI/CD, Git, Maven, Gradle
Monitoring & Logging	Grafana, Prometheus, Log4j
Concepts & Practices	RESTful APIs, Microservices, Test Automation (JUnit, Mockito)
Foreign Languages	English (C1), Finnish (A2), Russian (Native)
