## Summary

Backend developer with hands-on experience in building scalable Java applications using Spring Boot, PostgreSQL, and Kafka. Skilled in designing microservices, optimizing database performance, and deploying services with Docker and CI/CD pipelines. Experienced in both corporate and startup environments, with strong focus on reliability, automation, and clean code. Multilingual (English, Finnish, Russian) with international background across Finland, Austria, and Russia.

## Work Experience

01/2025 – 07/2025 **Java Software Engineer Intern**, *Nativy GmbH*, Vienna, Austria

- Developed scalable backend services with Java 17 & Spring Boot, powering CRM and analytics workflows.
- Optimized PostgreSQL queries, improving reporting performance by 25%.
- Built and deployed REST APIs for secure data integration with internal tools.
- Automated deployments using Docker and GitLab CI/CD.

02/2023 – 08/2023 **Java Software Engineer Intern**, *Yandex*, Moscow, Russia

- Refactored legacy services to align with modern Spring Boot 3 practices.
- Built microservices with Kafka integration, enabling real-time data exchange.
- Increased reliability through unit and integration testing (JUnit, Mockito).
- Configured monitoring dashboards (Grafana, Prometheus) to track service health.
